

21 January 2022

Dear parent/carer

An Astronomy Club for years 7-9 is starting here at Medina College, from 3.15 - 4.30 pm in S1.

The aim eventually is to learn about simple night sky observing, astrophysics, space imaging and photography, radio astronomy and as soon as we can, have 'star parties' at dark sky sites on the island as well as visits to Vectis Astronomical Society's observatory near Newchurch and hopefully other trips further afield as and when they are possible.

We are also very interested in inviting astronomers, engineers, astrophotographers and scientists to come in to speak to club members too.

If your child is interested, please fill out the form below and ask them to return it to me or the year office as soon as possible).

Yours faithfully

Jeremy Gray
